## PLANETS - SUMMARY

## COMPLETE THE TABLE WITH THE MOST IMPORTANT FACTS!

|         | Main Facts (Distance from the sun, rotation, orbit etc) | Atmosphere | Structure and<br>Surface | Discovery and<br>Exploration | Other important facts |
|---------|---------------------------------------------------------|------------|--------------------------|------------------------------|-----------------------|
| Mercury |                                                         |            |                          |                              |                       |
| Venus   |                                                         |            |                          |                              |                       |
| Earth   |                                                         |            |                          |                              |                       |
| Mars    |                                                         |            |                          |                              |                       |
| Jupiter |                                                         |            |                          |                              |                       |
| Saturn  |                                                         |            |                          |                              |                       |
| Uranus  |                                                         |            |                          |                              |                       |
| Neptune |                                                         |            |                          |                              |                       |
